Dear Mr. Pongkhamsing:

This email is being submitted in response to your letter to me dated August 22, 2017 sent by certified mail. My comments and response is as follows:

1. I am at a loss as to why your letter was sent to me with total disregard or acknowledgement of the long history of this complaint which has been thoroughly documented in your Reference File NWS-2015-894. You state that you inspected the site in January and then send out a letter 7 months later commenting on unauthorized activities. However, you don't state that you observed any unauthorized activities. That is because there aren't any unauthorized activities. Pursuant to requests made under File NWS-2015-894, the temporary hand placed armoring was removed over two years ago and the beach has been in a totally natural state ever since.
2. The issues mentioned in your August 22, 2017 letter were resolved over two years ago pursuant to File NWS-2015-894.
3. My responses to your August 22, 2017 questions are attached as marked in red. You have copies of all correspondence, maps and reports in your File NWS-2015-894. However, for convenience I have attached some of the more pertinent correspondence.
4. I trust that you will find my response complete and ask that you please put final closure to this alleged violation.

Jim Thompson, P.E., President
